Tania Rahman

MSc Computer Science · Computer vision for medical imaging
Dhaka, Bangladesh · tania.rahman@sample.invalid · github.com/sample-tania

EDUCATION

MSc, Computer Science, Sample University (fictional), 2023–2025. CGPA 3.72/4.00 (scale 4.00; rank 3 of 60). Thesis distinction.
BSc, Computer Science and Engineering, Sample Institute of Technology (fictional), 2018–2022. CGPA 3.58/4.00, top 8% of 140.

RESEARCH

Label-efficient segmentation of retina images (MSc thesis, 2024–2025)

- Trained a segmentation model on 400 labelled images; contrastive pre-training raised Dice from 0.78 to 0.86.
- Found a drop on images from a second clinic and designed a cross-site test.
- Released code, data splits and a project page.

Research assistant, vision lab (2024–present, remote mentor)

- Reproduced three published methods and documented where they failed on small data.
- Tutored two junior students on PyTorch.

PUBLICATIONS

- Rahman, T., and mentor. *Contrastive pre-training for small retina datasets*. Preprint, 2025. (sample)
- Poster, national student conference on AI, 2025. (sample)

SKILLS

Python, PyTorch, scikit-learn, Git, LaTeX. Evidence: public repository with tests and a reproducible pipeline.

LANGUAGES

Bangla (native), English (IELTS 7.5), German (A1, in progress).
